

Saint Barbara Greek Orthodox Church

Toms River, NJ

Energy Conservation Project

Most of our church's building and mechanical systems are still original, (over 40+ years old!), and the majority of our current lighting consumes way too much energy.

The Parish Council, working with a local energy conservation contractor, have been approved for a state-subsidized Energy Audit and Assessment Program that would include upgrade and replacement of almost ALL our building systems and equipment to the latest energy efficient models and units. This includes our boilers, heaters, air-conditioners, interior gym and hall lighting, and even our exterior parking lot lighting!

To invest in these systems outside of the program would cost the church over \$615,000. With a subsidized incentive rebate in place, the work will cost us only \$200,000 - which is a huge savings for our parish! In addition, the program includes 0% financing for 5 years, so our goal is to raise the funds to make a payment of at least \$40,000 per year for the next 5 years!

We are asking YOU, our beloved and loyal Parishioners, to come forward and help the Parish Council upgrade our systems, reduce our utility bills, and preserve our community for generations to come!

See reverse to learn how YOU can participate in this landmark project! We thank you for your support!
