

St. Nicholas Restoration Update

A LEGACY OF FAITH,
A FUTURE OF HOPE

ST. NICHOLAS GREEK ORTHODOX CATHEDRAL

Our restoration is moving forward—and St. Nicholas wishes everyone to be part of it.

- **Phase One is expected to begin within the next 30–45 days.**
- The first phase will include:
 - Sealing the exterior against water intrusion
 - Repairing the stained-glass windows
 - Adding protective storm windows
- The cost of Phase One is approximately **\$1.3 million**, and the work is expected to take **4–5 months**.
- We currently have approximately **\$1.5 million available or committed for the immediate work**, including a recent anonymous gift of \$700,000.(thank you so much to our donor!)
- To date, we have approximately **\$4.2 million in pledges and commitments toward our \$6 million restoration goal.**

St. Nicholas Needs Everyone to Participate!

There is no minimum gift. Please give what you can. Every commitment matters.

Please remember that a **restoration commitment, matching-fund gift, and memorial gift are different.** A **commitment form must be completed for every restoration commitment.** These commitments allow us to plan responsibly for the next phases of the project.

This is our Cathedral. This is our Legacy. And this is our opportunity to make sure St. Nicholas is here for the generations that come after us.

Please speak with any member of the Parish Council or Restoration Committee to make your commitment or ask questions.
